A veritable "Globalization for Dummies," 10 Reasons to Abolish the IMF & World Banklays bare the most common myths of globalization in a clear and understandable way. Looking with hope to grassroots movement-building on a global scale, Danaher presents ten arguments for abolishing the IMF and World Bank and replacing them with democratic institutions that would make the global economy more accountable to an informed and active citizenry. Conceived as an effort to educate the public about how international institutions of "free trade" are widening the gap between the rich and poor globally, Danaher reveals how the lending policies of the IMF and the World Bank fail to benefit Third World peoples, and instead line the pockets of undemocratic rulers and western corporations while threatening local democracies and forcing cuts to social programs. Through anecdotes, analysis, and innovative ideas, Danaher argues that the IMF and the World Bank undermine our most basic democratic values, and calls for reframing the terms on which international economic institutions are operated using the principles of environmental sustainability, social justice, and human rights.

In the old days, creating an international business was left to relatively few--those with the wherewithal to move boatloads of goods into foreign countries. But now, thanks to the Internet, businesses of all sizes have a huge new opportunity to sell both goods and services globally. Yet only 1% of all U.S. businesses export. Why? Typically, exporting begins with unsolicited inquiries from foreign customers on the web via email, website, blog, or posting on a Facebook page. People outside your country want your product, and they want it now. The problem is that most small business owners do not know how to service these inquiries. What's the best way to ship goods? Do I need a license? Should I sell through wholesalers in specific countries or directly to consumers? How will I get paid? Help is here—Exporting equips you with the knowledge you need to market, sell, and fulfill orders internationally, taking full advantage of the Internet and the opportunities it creates. It also imparts a can-do spirit on exporting, leading to greater revenues, stability, and profitability for your business. Exporting: The Definitive Guide to Selling Abroad Profitably: Lays out simple steps to conduct market research, find customers, open new markets, get paid, and ship goods and services. Takes

you through the exporting process via the Internet and other means. Shows how to use social media to expand your international presence. Provides insider tips and strategies to export efficiently and profitably. Explains how the U.S. government helps exporters. Walks readers through the export business plan. With 70 percent of global buying power lying outside U.S. borders, exporting is not just an option for ambitious entrepreneurs--it's an absolute must for building and sustaining a successful future.

"One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates
"Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly."
—Melinda Gates
Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

This original study examines the extent to which international labour issues have become issue of concern within the European Union, the ILO, the OECD (Organization for Economic Cooperation and Development), and the WTO (World Trade Organization).

This collection of essays emerged from a seminar on international investment law taught jointly by the editors at the Yale Law School. The participants brought a rich experience and, as important for a subject like this, a rich national diversity. A considerable part of the seminar involved close reading of recent international investment arbitration awards. These decisions have emerged as the most important engines of legal development in this field. Interestingly, in almost all instances, it was felt that the right decision had been reached. But without the building blocks that reasons reflect, one could not reconstruct or "reverse engineer" the reasoning of the tribunal. From this experience, it was concluded that it would be a useful exercise to examine the adequacy of reasons in some of the most important recent international investment law awards in order to see if there were significant trends with policy implications. The studies in this collection represent the best of the seminar.
