This ETC and UNWTO Handbook on Marketing Transnational Tourism Themes and Routes aims at acquiring a deeper understanding of the transnational tourism themes and routes that are already proposed to travellers. Through illustrative case studies it furthermore provides practical guidance - especially for NTAa and NTOs - on the creation and implementation of tourism routes, on marketing thematic tourism, including its development, management and promotion. The handbook will enrich UNWTO's tools for innovation, and feed into the ETC's 'Destination Europe 2020' strategy, contributing also to the development and promotion of its VisitEurope.com Internet portal.

The Handbook of Bird biology covers all major topics, from anatomy and physiology to ecology, behavior, and conservation biology. One full chapter addresses vocal communication and is accompanied by a CD of bird vocalizations. Produced by the Cornell Laboratory of Ornithology's world-renowned Macaulay Library of Natural Sounds, the CD illustrates key elements of bioacoustics. The book's text was written by 12 leading ornithologists and illustrated by respected photographers and artist John Schmitt. It includes an extensive glossary and index, a list of the common and scientific names of all birds mentioned in the text, author profiles, suggested readings following each chapter, and a complete reference section. The Handbook serves as the backbone of the Lab's popular Home Study Course in Bird Biology, a self-paced course that can be taken from anywhere in the world, by anyone with a serious interest in birds who would like guidance from professional ornithologists.

This volume collects the best scientific contribution presented in the 3rd World Conference on Terraced Landscapes held in Italy from 6th to 15th October 2016, offering a deep and multifaceted insight into the remarkable heritage of terraced landscapes in Italy, in Europe and in the World (America, Asia, Australia). It consists of 2 parts: a geographical overview on some of the most important terraced systems in the world (1st part), and a multidisciplinary approach that aims to promote a multifunctional vision of terraces, underlining how these landscapes meet different needs: cultural and historical values, environmental and hydrogeological functions, quality and variety of food, community empowerment and sustainable development (2nd part). The volume offers a great overview on strengths, weaknesses, functions and strategies for terraced landscapes all over the world, summarizing in a final manifest the guidelines to provide a future for these landscapes as natural and cultural heritage.

This book discusses a comprehensive spectrum of software engineering techniques and shows how they can be applied in practical software projects. This edition features updated chapters on critical systems, project management and software requirements.
