Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9781412979719 .

This comprehensive text introduces the basic aspects of modern criminology, emphasizing the importance of historical, feminist, and comparative perspectives on crime and offering a critical sociological perspective on the relationship between crime and structured social inequality. The authors explore what crime is and why it occurs by examining the four major forms of social inequality in the U.S.--class, gender, race, and age--and their influence on patterns of crime and victimization.

Crime Types and Criminals is an essential introduction to the study of criminology, focusing on

crime types in particular. This book provides broad coverage of all major crime types, as well as coverage of research methods and theory. This book can be used both as a stand-alone and supplementary text in courses such as introduction to criminology, crime and society, deviant behaviour, crime profiling, and many other courses within the criminology and criminal justice discipline. Unlike many of the current criminology books on the market, this is a brief book that really talks about all kinds of crime and criminals in detail in a way to capture and retain student interest.

"Understanding Youth in Late Modernity is a highly readable book which lends itself both as a solid introduction and a reference point to the historical developments and theoretical debates taking place within the discipline of youth studies. This book provides a highly accessible text for anybody interested in the subject of youth and its changing role in late modernity. I thoroughly recommend it." *Journal of Contemporary European Studies* This illuminating new book embeds our understanding of the youth question within a historical context. It shows how the ideas of past political action, in conjunction with the diverse paradigms of social science disciplines, have shaped modern conceptions of the youth question. This relationship between the political and the academic is then explored through a detailed examination of contemporary debates about youth, in areas such as; transitions, education, crime policy and criminology, consumption and youth culture. From this analysis the book is able to show how the youth question in late modernity is being shaped. This important text includes: A historical overview of the making of modern youth, identifying major changes that took place over three centuries Examples of how political and academic responses construct youth as a social problem An evaluation of the impact of social change in late modernity on our understanding of the youth question and the everyday lives of the young. The book concludes by suggesting that in contemporary understandings of the youth question significant differences exist between the political and the academic. Major challenges exist if this gap is to be addressed and a new public social science needs to emerge that reconstitutes debates about youth within a form of communicative democracy. Understanding Youth in Late Modernity is key reading for students and academics interested in the historical conception of the youth problem, its evolution throughout modernity and endeavours to find a solution.

High quality, compelling criminology text on terrorism - much needed in the market.

This reader covers several of the seminal articles written about theories of crime as it relates to human developmental and biological issues. As an emerging market and a very hot topic in criminology theory, the life-course approach builds on recent trends in psychology and sociology, thus answering the growing desire for integrated theories. The authors of this reader have created a "greatest hits" of life-course from the biggest life-course luminaries. The authors have prepared extensive introductions to provide context for each article.

Provides psychological and psychiatric insight to criminal behavior by exploring criminology as a science and the human mind in relation to crime. Specifically addresses heredity and environment as causes of crime, and juvenile and war delinquency.

Via 100 entries or 'mini-chapters,' the SAGE 21st Century Reference Series volumes on Anthropology will highlight the most important topics, issues, questions, and debates any student obtaining a degree in the field of anthropology ought to have mastered for effectiveness in the 21st century. The purpose is to provide undergraduate students with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail or density as a journal

article or a research handbook chapter.

What is the major social problem in the news today? Who made it so important? Social issues that are widely recognized on the media agenda often demand attention on the public agenda, and in turn move quickly up the policy agenda, creating policy changes. Based on research of contemporary social issues that have hit the headlines - including the war on drugs, drink-driving, the Exxon Valdez oil spillage, AIDS and the Ethiopian famine - this book provides important theoretical and practical insights into the agenda-setting process and its role in effecting social change.
