"Principles of Economics is designed for a two-semester principles of economics sequence."--Page 6.

Suffocating smog regularly envelops Chinese metropolises from Beijing to Shanghai, clouding the future prospect of China's growth sustainability. Air pollutants do not discriminate between the rich and the poor, the politician and the "average Joe." They put everyone's health and economic prosperity at risk, creating future costs that are difficult to calculate. Yet many people, including some in China, are concerned that addressing environmental challenges will jeopardize economic growth. In *The Economics of Air Pollution in China*, leading Chinese economist Ma Jun makes the case that the trade-off between growth and environment is not inevitable. In his ambitious proposal to tackle severe air pollution and drastically reduce the level of so-called PM 2.5 particles—microscopic pollutants that lodge deeply in lungs—Ma Jun argues that in targeting pollution, China has a real opportunity to undertake significant structural economic reforms that would support long-term growth. Rooted in rigorous analyses and evidence-based projections, Ma Jun's "big bang" proposal aims to mitigate pollution and facilitate a transition to a greener and more sustainable growth model.

The second edition of *Effective Grading*—the book that has become a classic in the field—provides a proven hands-on guide for evaluating student work and offers an in-depth examination of the link between teaching and grading. Authors Barbara E. Walvoord and Virginia Johnson Anderson explain that grades are not isolated artifacts but part of a process that, when integrated with course objectives, provides rich information about student learning, as well as being a tool for learning itself. The authors show how the grading process can be used for broader assessment objectives, such as curriculum and institutional assessment. This thoroughly revised and updated edition includes a wealth of new material including: Expanded integration of the use of technology and online teaching A sample syllabus with goals, outcomes, and criteria for student work New developments in assessment for grant-funded projects Additional information on grading group work, portfolios, and service-learning experiences New strategies for aligning tests and assignments with learning goals Current thought on assessment in departments and general education, using classroom work for program assessments, and using assessment data systematically to "close the loop" Material on using the best of classroom assessment to foster institutional assessment New case

examples from colleges and universities, including community colleges "When the first edition of Effective Grading came out, it quickly became the go-to book on evaluating student learning. This second edition, especially with its extension into evaluating the learning goals of departments and general education programs, will make it even more valuable for everyone working to improve teaching and learning in higher education." —L. Dee Fink, author, *Creating Significant Learning Experiences* "Informed by encounters with hundreds of faculty in their workshops, these two accomplished teachers, assessors, and faculty developers have created another essential text. Current faculty, as well as graduate students who aspire to teach in college, will carry this edition in a briefcase for quick reference to scores of examples of classroom teaching and assessment techniques and ways to use students' classroom work in demonstrating departmental and institutional effectiveness." —Trudy W. Banta, author, *Designing Effective Assessment*

An African-American family is united in love and pride as they struggle to overcome poverty and harsh living conditions, in the award-winning 1959 play about an embattled Chicago family

"A wealth of information in an engaging package." — Kirkus Reviews Ever since George Washington used them to help topple the British, spies and their networks have helped and hurt America at key moments in history. In this fascinating collection, Paul B. Janeczko probes examples from clothesline codes to surveillance satellites and cyber espionage. Colorful personalities, daring missions, the feats of the loyal, and the damage of traitors are interspersed with a look at the technological advances that continue to change the rules of gathering intelligence. Back matter includes source notes and a bibliography.

Thomas Hardy (2nd June 1840 – 11th January 1928) was an English novelist and poet. He was influenced by Romanticism and it has been reflected in his novels and poetry. He was criticised by the Victorian society on the issue of the declining status of rural people in Britain. He was basically a poet. Initially he started writing poems. But he gained fame after his novels, such as – *Far from the Madding Crowd*, *The Mayor of Casterbridge*, *Tess of the d'Urbervilles* and *Jude the Obscure*. Two of his novels, 'Tess of the d'Urbervilles' and 'Far from the Madding Crowd', were listed in top 50 on the BBC survey- *The Big Read*. The story of 'Tess of the d'Urbervilles' revolves around a 16-year-old very simple girl, named Tess Durbeyfield, who is the eldest daughter of John and Joan Durbeyfield. Since the family suffers acute financial crisis, so they approach the d'Urbervilles family who are holding huge land and having a lot of money. There Tess meets Alec d'Urberville, who finds himself attracted to Tess. When Tess started working as a caretaker of Alec's blind mother's poultry farm, Alec gets an opportunity to rape her. After that there are many ups and downs in Tess' life. She meets Mr. Crick for another job. She also meets one more fellow Angel Clare, who is a travelling farmer's apprentice. They marry each other. But after knowing her story, again there is a turn in Tess' life. How she manages all such situations, how she meets all the financial aspects, a lot of things happen with Tess. Even Alec and Angel both start searching for Tess. So, the story has become very interesting, full of climax. How Tess meets Alec or Angel? Whether she gets involved with any of these two again? There are so many presumptions. Readers will surely enjoy the story, full of suspense and never expected ups & downs in the life of all the characters. At last, how Angel helps Tess and her family is the climax. Go ahead and must grab the book. A must-read book for self-development and how to be a good leader.

Controlling inflation is among the most important objectives of economic policy. By maintaining price stability, policy makers are able to reduce uncertainty, improve price-monitoring mechanisms, and facilitate more efficient planning and allocation of resources, thereby raising productivity. This volume focuses on understanding the causes of the Great Inflation of the 1970s and '80s, which saw rising inflation in many nations, and which propelled interest rates across the developing world into the double digits. In the decades since, the immediate cause of the period's rise in inflation has been the subject of considerable debate. Among the areas of contention are the role of monetary policy in driving inflation and the implications this had both for policy design and for evaluating the performance of those who set the policy. Here, contributors map monetary policy from the 1960s to the present, shedding light on the ways in which the lessons of the Great Inflation were absorbed and applied to today's global and increasingly complex economic environment.

A New York Times Book Review Editors' Choice "Extremely wide-ranging and well researched . . . In a tradition of protest literature rooted more in William Blake than in Marx." —Adam Gopnik, *The New Yorker* The epic story of how coffee connected and divided the modern world Coffee is an indispensable part of daily life for billions of people around the world. But few coffee drinkers know this story. It centers on the volcanic highlands of El Salvador, where James Hill, born in the slums of Manchester, England, founded one of the world's great coffee dynasties at the turn of the twentieth century. Adapting the innovations of the Industrial Revolution to plantation agriculture, Hill helped turn El Salvador into perhaps the most intensive monoculture in modern history—a place of extraordinary productivity, inequality, and violence. In the process, both El Salvador and the United States earned the nickname "Coffeeland," but for starkly different reasons, and with consequences that reach into the present. Provoking a reconsideration of what it means to be connected to faraway people and places, *Coffeeland* tells the hidden and surprising story of one of the most valuable commodities in the history of global capitalism.

This study presents options to fully unlock the world's vast solar PV potential over the period until 2050. It builds on IRENA's global roadmap to scale up renewables and meet climate goals.
