Infrastructure and its effects on economic growth, social welfare, and sustainability receive a great deal of attention today. There is widespread agreement that infrastructure is a key dimension of global development and that its impact reaches deep into the broader economy with important and multifaceted implications for social progress. At the same time, infrastructure finance is among the most complex and challenging areas in the global financial architecture. Ingo Walter, Professor Emeritus of Finance, Corporate Governance and Ethics at the Stern School of Business, New York University, and his team of experts tackle the issue by focussing on key findings backed by serious theoretical and empirical research. The result is a set of viable guideposts for researchers, policy-makers, students and anybody interested in the varied challenges of the contemporary economy.

The latest book from Cengage Learning on Economics

This book looks at a number of topics in economic education, presenting multiple perspectives from those in the field to anyone interested in teaching economics. Using anecdotes, classroom experiments and surveys, the contributing authors show that, with some different or new techniques, teaching economics can be more engaging for students and help them better retain what they learned. Chapters cover a wide range of approaches to teaching economics, from interactive approaches such as utilizing video games and Econ Beats, to more rigorous examinations of government policies, market outcomes and exploring case studies from specific courses. Many of the chapters incorporate game theory and provide worked out examples of games designed to help students with intuitive retention of the material, and these games can be replicated in any economics classroom. While the exercises are geared towards college-level economics students, instructors can draw inspiration for course lectures from the various approaches taken here and utilize them at any level of teaching. This book will be very useful to instructors in economics interested in bringing innovative teaching methods into the classroom.
