Angesichts der fortschreitenden Konvergenz der Medien wird der EU Rechtsrahmen für audiovisuelle Mediendienste hinterfragt. Zu diesem Zweck untersucht die Autorin die Maßnahmen und Aktivitäten der französischen, deutschen und britischen Regulierungsbehörden im Hinblick auf die Umsetzung und Anwendung gewisser Regeln, die in der EU Richtlinie über audiovisuelle Mediendienste (AVMD-RL) normiert sind. Konkret analysiert sie die Vorschriften zum Anwendungsbereich der Richtlinie und dem Jugendmedienschutz in audiovisuellen Mediendiensten auf Abruf. Die Gemeinsamkeiten und Unterschiede der nationalen Regulierungspraxis werden herausgestellt und best practices hergeleitet. Das Werk positioniert sich deutlich in der aktuellen Debatte zur Reform der AVMD-RL, indem es konkrete Vorschläge für die Gestaltung des zukünftigen EU Rechtsrahmens macht.

Successful digital healthcare depends on the effective flow of a complete chain of information; from the sensor, via multiple steps of processing, to the actuator, which can be anything from a human healthcare professional to a robot. Along this pathway, methods for automating the processing of information, like signal processing, machine learning, predictive analytics and decision support, play an increasing role in providing actionable information and supporting personalized and preventive healthcare concepts in both biomedical and digital healthcare systems and applications. ICT systems in healthcare and biomedical systems and devices are very closely related, and in the future they will become increasingly

intertwined. Indeed, it is already often difficult to delineate where the one ends and the other begins. This book presents the intended proceedings of the dHealth 2020 annual conference on the general topic of health Informatics and digital health, which was due to be held in Vienna, Austria, on 19 and 20 May 2020, but which was cancelled due to the COVID-19 pandemic. The decision was nevertheless taken to publish these proceedings, which include the 40 papers which would have been delivered at the conference. The special topic for the 2020 edition of the conference was Biomedical Informatics for Health and Care. The book provides an overview of current developments in health informatics and digital health, and will be of interest to researchers and healthcare practitioners alike.

This major work presents the first comprehensive survey on entomological studies in Iran from prehistoric periods up to modern times. This concise collection and excerpts from the literature are complemented by over 130 color figures of superb quality showing insects and their habitats. Volume 1 Faunal Studies concentrates on the systematic taxonomy of Iranian insects. It also lists all members of Rhopalocera (butterflies) and four families of Heterocera (moths). An introductory chapter is reserved

for basic information on the geography, vegetation and climate of Iran. Volume 2 Applied Entomology starts with a chapter on the history of entomology in Iran until current times. Several chapters cover agricultural aspects of entomology, such as destructive insects, biological control or cultivars exhibiting resistance to insect pests. Other chapters are on medical entomology, e.g. mosquito-, sandfly- or flea-borne diseases and human myiasis.
