Engineering Design Graphics provides a clear, concise treatment of the essential topics addressed in a modern engineering design graphics course. Projection theory provides the instructional framework, and freehand sketching the means for learning the important graphical concepts at the core of this work. The text includes several hundred sketching problems, all serving to develop the student 's ability to use sketching for ideation and communication, as well as a means to develop critical spatial visualization skills. A chapter on computer-aided product design software, with an emphasis on parametric solid modeling, is also included.

Artists around the world have lately been turning to their bookshelves for more than just a good read, opting to cut, paint, carve, stitch or otherwise transform the printed page into whole new beautiful, thought-provoking works of art. Art Made from Books is the definitive guide to this compelling art form, showcasing groundbreaking work by today's most showstopping practitioners. From Su Blackwell's whimsical pop-up landscapes to the stacked-book sculptures of Kylie Stillman, each portfolio celebrates the incredible creative diversity of the medium. A preface by pioneering artist Brian Dettmer and an introduction by design critic Alyson Kuhn round out the collection.

In the first volume of Post Editions's new series on the creative potential of seemingly everyday materials, the subject is paper - in amazing depth. This striking book asks nine scholars and artists to take a multi-layered look at paper, from its beginnings in second-century China to surprising contemporary approaches. Essay topics include: species of wasps and hornets that make paper and cardboard remarkably similar to our own; the 18th-century German clergyman whose life's work was experimenting with various materials to make paper; and Cardboardia, a community of "visionary architecture." Origami master Paul Jackson writes about "paper music" - using paper as an acoustic medium, and Chiaki Morita introduces washi, the Japanese art of hand-made paper from the mulberry tree. Stunning black and white photos complete this impeccable package.

This pictorial survey of Western architecture, covering ancient Egyptian times to the present, contains two thousand drawings of buildings, ground plans, and architectural details. The book includes maps, time-charts, and a very brief text.

Improve your free-motion quilting as you sketch new designs—one simple shape at a time. Christina Cameli, best-selling author of First Steps to Free-Motion Quilting, returns with the perfect companion book to help you quilt unique patterns, using your home machine or longarm. A member of the Portland Modern Quilt Guild, Christina infuses her fresh aesthetic and passion for teaching quilters new skills into 80+ innovative free-motion designs. Working from a set of nine simple shapes, such as circles, wavy lines, and loops, she walks you through the basic elements via easy-to-doodle illustrations. Take the design power to your needle as you stitch Christina's favorite continuous-line quilting patterns, ranging from straightforward to striking. If you can doodle, you can do it!

This lavishly illustrated book is a source of inspiration for all adepts of the recognisable Piet Boon style. In this, her first book, Karin gives her definition of styling and shares her tips and tricks, gathered over the past 25 years as creative dire

Accompanies an exhibition at the Museum of Arts & Design, New York, 7 October 2009 - 10 January 2010.
