A cultural history of the Volkswagen Beetle as told through historical photographs, many never before published in the U.S. From the birth of the Beetle in wartime Germany through the development of the New Beetle prototype, Volkswagen Beetle: Portrait of a Legend celebrates a lighthearted, unusual view of the most successful automobile in history. This book is not a "how to identify your Beetle" book, nor is it a year-by-year charting of model changes. Rather, through other people's experiences of the car, it allows readers to recall their own fond memories of what it was really like to own a Beetle in its heyday.

Father Pat Cheyne, an unkempt, middle-aged priest on a lone canoe ride reflects on how these solitary meditations in his beloved canoe have marked his life. His thoughts reach back to his boyhood rejection of the boisterous ways of his father, just home from the war, to the memorable evening when he first prayed, eyes open, floating in a silent magic space with stars drenching the sky above and mirror lake below him. Even now, the canoe remains his own vehicle for understanding solitude. The Father Pat Stories chronicle the Anglican priest and former member of Parliament's pattern of engagement and disengagement as he very actively applies tolerance and forgiveness to his parishioner's difficulties in a world where religion often stands for intolerance and exclusion. The fast paced adventures engage a tight trio of friends

Autonomous State provides the first detailed examination of the Canadian auto industry, the country's most important economic sector, in the post-war period. In this engrossing book, Dimitry Anastakis chronicles the industry's evolution from the 1973 OPEC embargo to the 1989 Canada-US Free Trade Agreement and looks at its effects on public policy, diplomacy, business enterprise, workers, consumers, and firms. Using an immense array of archival sources, and interviews with some of the key actors in the events, Anastakis examines a fascinating array of topics in recent auto industry and Canadian business and economic history: the impact of new safety, emissions, and fuel economy regulations on the Canadian sector and consumers, the first Chrysler bailout of 1980, the curious life and death of the 1965 Canada-US auto pact, the 'invasion' of Japanese imports and transplant operations, and the end of aggressive auto policy-making with the coming of free trade. More than just an examination of the auto industry, the book provides a rethinking of Canada's tumultuous post-OPEC political and economic evolution, helping to explain the current tribulations of the global auto sector and Canada's place within it.
