Picked up the SA-2500 from a SK shack. Heathkit brown, and definitely not for a small shack. WOW! It is BIG, bigger than my amps, bigger than my radios, but it is capable of amazing matching. As a test I attached an 8 foot wire at 6 feet, OK for 10m, but it was able to tune on 80m without a complaint.

Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from
