~~It Service Management Configuration Sap~~

Service management (SM) is considered a separate module by itself but it is normally tag along with the Plant Maintenance and Customer Service module for the equipment servicing for

Access Free It Service Management Configuration

after-sales services. SAP R/3 Service Management (SM) module is fully capable to support customer demands more effective and quick service.

~~What is SAP Service Management | SAP SM~~

The IT Service Management has been enhanced with many new functionalities in release 7.2. The good news is, we kept all the existing frameworks and features from the release 7.1 and also recent upgrade will have a low impact on existing solutions and it will bring additional values to customers.
