

## Lt1021 Precision Reference

If you ally compulsion such a referred lt1021 precision reference ebook that will come up with the money for you worth, acquire the extremely best seller from us currently from several preferred authors. If you desire to humorous books, lots of novels, tale, jokes, and more fictions collections are after that launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all books collections lt1021 precision reference that we will certainly offer. It is not a propos the costs. It's roughly what you craving currently. This lt1021 precision reference, as one of the most vigorous sellers here will unconditionally be in the middle of the best options to review.

Portable Reference Standard The LT \u2122 1021 is a precision reference with ultralow drift and noise, extremely good long term stability and almost total immunity to input voltage variations. The reference output will both source and sink up to 10mA. Three voltages are available: 5V, 7V and 10V.

~~Lt1021 - Precision Reference - Analog Devices~~

DESCRIPTION The LT \u2122 1021 is a precision reference with ultralow drift and noise, extremely good long term stability and almost total immunity to input voltage variations. The reference output will both source and sink up to 10mA. Three voltages are available: 5V, 7V and 10V.

~~Lt1021 Precision Reference - Digi-Key~~

The LT1021 is a precision reference with ultralow drift and noise, extremely good long term stability and almost total immunity to input voltage variations. The reference output will both source and sink up to 10mA. Three voltages are available: 5V, 7V and 10V.

The LT1021 Reference IC now has conformal coating applied to minimize the effects of humidity. The guaranteed Temperature Coefficient has been reduced to  $\pm 5 \mu V / \text{ }^\circ F$  ( $\pm 0.9\text{ppm}/\text{C}$ ) typical,  $\pm 7 \mu V / \text{ }^\circ F$  ( $\pm 1.3\text{ppm}/\text{C}$ ) maximum. All units are temperature tested in our thermal chamber.

Recall and precision are often used to evaluate the effectiveness of information retrieval systems. They are easy to define if there is a single query and if the retrieval result generated for the query is a linear ordering.
