substances, medications and new tables **UNIQUE!** Examining the Evidence boxes explain the reasoning behind nursing interventions and how research affects everyday practice. **UNIQUE!** Applying the Art sections communication tables in the clinical chapters provide examples of therapeutic and nontherapeutic communication techniques as well as realistic nurse-patient interaction scenarios. Key concepts and terms clarify essential terminology. Potential Nursing Diagnosis tables give several possible nursing diagnoses for a particular disorder along with the associated signs and symptoms. Vignettes offer succinct, real-life glimpses into clinical practice by describing patients and their psychiatric disorders. Assessment Guidelines familiarize readers with methods of assessing patients. Critical thinking questions introduce clinical situations in psychiatric nursing. Key Points to Remember outline the main concepts of each chapter in an easy to comprehend and concise bulleted list.

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment for the reproductive system.

"Mosby's Pathology for Massage Therapists, Second Edition, provides complete pathology information with specific message considerations in one convenient text! You'll discover how to adapt massage techniques to ease pain and discomfort, promote healing, and ensure the safety of your clients for a wide range of medical conditions. Unmistakable "stoplight" icons let you know when massage is indicated (green), when to proceed with caution (yellow), and when massage is contraindicated (red)." --Book Jacket.

Written by a massage therapist for massage therapists, Mosby's Pathology for Massage Therapists, 3rd Edition provides direct information along with focused recommendations. Coverage of over 340 pathologies helps you appropriately tailor massage treatment, and more than 750 full-color photographs and illustrations make it easier to recognize common pathologies. This edition includes a new chapter on geriatric massage and has been extensively reviewed by over a dozen experts in the massage and medical fields. Written by massage therapy educator and practitioner Susan Salvo, this resource provides the pathology knowledge you need to succeed on licensure and certification exams and in practice. A traffic light icon appears before each pathology in the book, designating whether massage is contraindicated (red), local contraindication (yellow), or indicated (green) for that particular pathology. Consistent format for each chapter makes it easy to find key information with learning objectives, list of pathologies, system overview, and pathologies, including description, etiology, signs and symptoms, treatment, and massage considerations. Student-friendly features in each chapter include learning objectives and self-tests that measure your comprehension. Medical Technology boxes highlight special populations, such as clients in wheelchairs or with pacemakers, and explain what the medical device is, and what special precautions or contraindications you should be aware of before working on these clients. Spotlight on Research boxes summarize recent studies of massage therapy and its effects. Student resources on an Evolve companion website include interactive activities, video clips of techniques, animations, the Body Spectrum coloring book, flashcards, review questions, additional case studies, an image collection, an audio glossary, study tips, stress-busting tips, research updates, and more. Mosby's Pathology for Massage Therapists Online reinforces content covered in the book and provides a dynamic way to learn key concepts, with features including recall activities, rollover glossary terms and definitions, animations, quizzes, and Clinical Tips boxes. (Available separately.)

"Essentials of Pediatric Nursing is intended for Pediatric Nursing courses with an integrated pediatric curriculum. It provides a unique concept-based approach and nursing process focus, that helps students go from concept to application by building on previously mastered knowledge from other courses.
