### *Motivational Interviewing in Healthcare: 10 Strategies*

"Motivational Interviewing in Health Care offers a new approach in communicating for nurses?particularly providers treating patients with chronic diseases such as diabetes and obesity?and all health care professionals working to assist patients in making lifestyle changes for better health....As information technology relentlessly invades the realm of patient care, we find ourselves with less time to communicate with and teach our patients, so the time we do have must be optimized....In ...

### *Motivational Interviewing in Health Care: Helping Patients ...*

Motivational Interviewing for Health Care Professionals, gives a clear picture of not only what to say to a patient needing help in their medical care but also what not to say. It attempts to take the patient from "reacting" to health care advice to "thinking and reasoning" about health care, moving the thought processes from the limbic to the frontal areas of the brain where reasoning can take over.

### *Motivational Interviewing for Health Care Professionals ...*

When beginning a motivational interviewing session, many healthcare organizations, including both Harvard Pilgrim and the AAFP, advocate the OARS acronym: Open-ended questions Affirmations (expressing empathy and celebrating even small successes) Reflective listening (repeating words back to ...

not just giving people treatment. They come in with challenges connected to the way they lead their lives.

*Motivational Interviewing in Healthcare | Stephen Rollnick*  
Lecturing at patients and arguing with them to change their unhealthy behaviors is rarely successful. Human nature resists being told what to do. Motivational interviewing, conceived by psychologists for the treatment of alcoholism, is a less confrontational method in which the patient, not the clinician, gives voice to the argument for change.

*Motivational Interviewing in Health Care: Helping Patients ...*  
Motivational interviewing (MI) is a clinical communication skill that nurses can develop to elicit patients' personal motivations for changing behavior to promote health. Nurses can then emphasize these factors in their teaching to help patients modify their behavior.<sup>1</sup>

*Motivational interviewing: A journey to improve health ...*  
Motivational interviewing (MI) has been well studied in specialist settings. There has been considerable interest in applying MI to community health care settings. Such settings represent a significant departure from the more traditional, specialist settings in which MI has been developed and tested.

*Motivational interviewing in health care settings ...*  
Motivational interviewing (MI) is an evidence-based practice for addressing and treating persons with substance use disorders. Providers are encouraged to use this technique during the brief intervention phase of the screening, brief intervention, and referrals to treatment (SBIRT) approach.
