Every Haynes manual is based on a complete teardown and rebuild, contains hundreds of "hands-on" photos tied to step-by-step instructions, and is thorough enough to help anyone from a do-it-your-selfer to a professional.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The 1-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

There has been a Skyline in Nissan's line-up since 1966. After many changes the Skyline found its sporting feet again in 1981 and 1986. The R32 Skyline GT-R name was revived in 1989 and has hardly been altered since. It has been very successful and has dominated Group A Touring Car racing worldwide. This is a book of contemporary road and comparison tests, new model introductions, driver's impressions, long term report, buying second-hand, track tests.
