This book contains all of the OCR Exam Past Papers for B1-B3 from 2012 to 2015. This book also contains 6 marker practice for modules B1 and B2. This book is for OCR students studying double or triple sciences with modules B1, B2 and B3.

A revision guide covering the core content of the OCR Science B (single award) specification from the Gateway Science suite.

This guide incorporates advice on the exam questions, including tips on how to prepare and tackle the exam with practical "test yourself" questions. It includes clear summaries of all the topics covered in the specification with definitions of the key terms and a "did you know?" section.

This text attempts to develop the processes, skills and knowledge that students need to succeed in OCR GCSE Drama. Written by experienced examiners, it aims to ensure that students are confident in their understanding and application of the drama elements, including use of dramatic language.

Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the OCR specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

This text engages every student and stimulates their interest in science. It provides a simple and clear approach to all resources available, with all the help and support you need to teach the new specifications with ease and make the transition as smooth as possible.

Thinking Skills, second edition, is the only endorsed book offering complete coverage of the Cambridge International AS and A Level syllabus.
