In Shoji and Kumiko Design Book 2 Beyond the Basics, Des King continues on from where he finished with Book 1 The Basics, and takes instruction in shoji patterns and kumiko art to the next level. Book 2 explores much more complex kumiko arrangements with two stunning shoji projects, and an extensive array of beautiful and intricate kumiko patterns, ranging from relatively simple, to highly advanced. He provides detailed instructions with more than 500 photographs and diagrams on how to make more than forty kumiko patterns in the square, diamond and hexagonal layout using tools found in any Western workshop, and simple shop-made jigs. No specialized tools are required for the patterns covered in Book 2. The kinds of patterns in this book will turn a simple attractive shoji into an exquisite and eye-catching work of art that will add great flair and style to your home.

From the configuration of Empire in the colonial period to the multiple facets of modern coloniality, this book offers a challenging approach to the developments and effects of imperial domination and neocolonial rule in Latin American.

This is no ordinary love story; it is more than that. It is about joy and pain and laughter; life and loss; who we are and what really matters to us. A novel that touches on history, destiny, and fate.

Includes step-by-step solutions for all Lesson Practice and Mixed Practice problems.

Edited by Thomas Caron. Text by Jean-Francois Chevrier, Carlo McCormick, Philippe van Cauteren, Arty Nelson, Thomas Caron.

Papers from a recent conference highlight the need for emission reduction strategies and technologies in transport and off-highway mobile machinery. They address issues faced by vehicle machine and engine manufacturers regarding future emission legislation, and discuss technical strategy together with the likely direction that research will take in response to these legislative demands. Focus is on reciprocating engines and their application challenges, with additional coverage of measurement techniques, installation dilemmas, and legislation trends. Specific subjects include hybrid power train systems, an injection natural gas engine for light-duty applications, and evaporative emission systems. Of interest to those working in industries involving combustion systems, fuel and air systems, engine design, and vehicle and machine systems. Lacks a subject index. c. Book News Inc.
