Pigs unite and divide people, but why? Pig/Pork explores the love-hate relationship between humans and pigs through the lenses of archaeology, biology, history and gastronomy, providing a close and affectionate look of the myriad causes underlying this singular, multi-millennial bond. What is it that people in

File Type PDF

Pig 05049

all four corners of the world find so fascinating about the pig? When did the human obsession with pigs begin, how did it develop through time, and where is it heading? Why are pigs so special to some of us, but not to others? Pig/Pork sets out to answer these and other porcine-related questions, examining human-pig interactions

across the globe through time, from the Palaeolithic to the present day. The book dissects pig anatomy and behaviour, and describes how this knowledge plays a major role in the advance of the agricultural and medical sciences, among others. The book also looks closely at the history of pig-human

Pig 05049

interaction; how they were domesticated and when, how they affected human history through their diseases, and how they have been involved in centuries of human conflicts, with particular reference to the story of the Iberian Jews and Muslims at the time of the Inquisition. The book goes on to look at how pigs' characteristics

and our relationship with them have combined to produce many of the world's great dishes. All this is accompanied by a liberal peppering of pork recipes and the stories behind them, along with facts, wisdom and porker lore, providing a thought-provoking account of where our food comes

from, both historically and agriculturally, and how this continues to influence many parts of our behaviour and culture.

Following a tour through the largest and most energy-efficient waste-to-energy plant in the world, Dutch artist and designer Christien Meindertsma became

intrigued with the dark residue leftover by the process of incinerating municipal solid waste. Using a 25-kilo sample of raw bottom ash, as it is called, she demonstrates the rich properties and versatility of this resource by successfully gleaning numerous materials from it by hand – among them valuable

reusable ones such as zinc, aluminium, copper, and silver.

Meindertsma commissioned photographer Mathijs Labadie to document every step of this exhaustively precise process in a surprisingly scientific inquiry.

The Nature of Value presents a theory of how

economic value functions and how it drives growth, starting with tiny sparks of innovation and scaling all the way up to the full scope of the economy.

Nick Gogerty's exploration of value borrows from a wide array of disciplines, including anthropology, psychology, physics, sociology, and ethics,

but most of all, it examines how evolution's processes can help investors understand the economy and how investors can use this new understanding to improve their allocation decisions. Starting with a look at how innovations can help firms succeed, Gogerty looks at the economic

niches in which firms compete and explores how firms can create defensive "moats" to enhance their chances of survival. He shows allocators how to adjust their actions for best performance and returns and what to look for when assessing company management, supporting his arguments with

extensive data and years of practitioner experience from scientific, social, and economic disciplines. Intuitive illustrations are used to illuminate central concepts and ideas. Gogerty's practical takeaways, couched in vivid explanations, will help investors of all backgrounds gain fresh

insight into market mechanics.

Christien Meindertsma has spent three years researching all the products made from a single pig. Amongst some of the more unexpected results were: Ammunition, medicine, photo paper, heart valves, brakes, chewing gum, porcelain,

Pig 05049

cosmetics, cigarettes, conditioner and even bio diesel. Meindertsmma makes the subject more approachable by reducing everything to the scale of one animal. After it's death, Pig number 05049 was shipped in parts throughout the world. Some products remain close to their original form and function while

File Type PDF

Pig 05049

others diverge dramatically. In an almost surgical way a pig is dissected in the pages of the book - resulting in a startling photo book where all the products are shown at their true scale (1:1).

In the 1990s a small midwestern American town approved the construction of a

Pig 05049

massive pork complex, where almost 7 million hogs are birthed, raised, and killed every year. In *Porkopolis* Alex Blanchette explores how this rural community has been reorganized around the life and death cycles of corporate pigs. Drawing on over two years of ethnographic fieldwork, Blanchette immerses

File Type PDF

Pig 05049

readers into the workplaces that underlie modern meat, from slaughterhouses and corporate offices to artificial insemination barns and bone-rendering facilities. He outlines the deep human-hog relationships and intimacies that emerge through intensified industrialization, showing how even the

Pig 05049

most mundane human action, such as a wayward touch, could have serious physical consequences for animals. Corporations' pursuit of a perfectly uniform, standardized pig—one that can yield materials for over 1000 products—creates social and environmental instabilities that transform human lives

and livelihoods.

Throughout Porkopolis, which includes dozens of images by award-winning photographer Sean Sprague, Blanchette uses factory farming to rethink the fraught state of industrial capitalism in the United States today.

appearance, providing access to complex systems and networks and acting as gateways and interpreters.

Whether openly and actively, or in subtle, subliminal ways, things talk to us, and designers write the initial script that lets us develop and improvise the dialogue. Talk to Me focuses on objects that involve

A fascinating exploration of our past, present, and future relationship with food
For the first time in

File Type PDF

Pig 05049

human history, there is food in abundance throughout the world.

More people than ever before are now freed of the struggle for daily survival, yet few of us are aware of how food lands on our plates.

Behind every meal you eat, there is a story.

Hamburgers in Paradise explains how. In this wise and passionate

File Type PDF

Pig 05049

book, Louise Fresco takes readers on an enticing cultural journey to show how science has enabled us to overcome past scarcities—and why we have every reason to be optimistic about the future. Using hamburgers in the Garden of Eden as a metaphor for the confusion surrounding food today, she looks at

File Type PDF

Pig 05049

everything from the dominance of supermarkets and the decrease of biodiversity to organic foods and GMOs. She casts doubt on many popular claims about sustainability, and takes issue with naïve rejections of globalization and the idealization of "true and honest" food. Fresco explores topics such as

File Type PDF

Pig 05049

agriculture in human history, poverty and development, and surplus and obesity. She provides insightful discussions of basic foods such as bread, fish, and meat, and intertwines them with social topics like slow food and other gastronomy movements, the fear of technology and risk, food and
