process is a mathematical object usually defined as a family of random variables. Many stochastic processes can be represented by time series. However, a stochastic process is by nature continuous while a time series is a set of observations indexed by integers.

Randomness, and talk about the expected value that you get, or the average value if you sample that way. In this particular example with probability $1/4$, you get a 1, with probability $1/4$, you get a 1 with probability $1/4$, you get a 1.
