The QlikView server in the front end manages the client
server communication between the user and QlikView
backend system. Back End. The QlikView backend consists of
QlikView desktop and QlikView publisher. The QlikView
desktop is a wizard-driven Windows environment, which
has the features to load and transform data from its source.
Its drag and drop feature is used to create the GUI layout of
the reports that becomes visible in the frontend.
