Sometimes, love is just an illusion.

Sometimes, it becomes the sole purpose of your life. While stories on social media were trending, Raghu was lost in books. For him, even the idea of falling in love was limited to books-until he met Ruhi. As their love plays out against the backdrop of the

upcoming student elections, Raghu finds himself embroiled in a mess he cannot seem to get out of. When his closest friends hatch a plan to rescue him, it only puts him in further jeopardy. Will his love sail through or will it get swept away by the storm of campus politics? Set in this elaborate sociopolitical milieu, Sudeep's new book explores the dark side of relationships, the pursuit of power and the hypocrisy of the powerful.

An anthology of writings on atheism, agnosticism, and skepticism by some of the world's most celebrated thinkers.

ID/372. Also available in hardback (ISBN 9211062705)

Notable luminaries throughout history have been inspired and humbled by the simple joy of riding a bicycle. For centuries, this powerful connection between people and bikes has driven humans forward as inventors, travelers, and thinkers. From Susan B. Anthony and Mark Twain to Eddy Merckx and Greg LeMond, collected here are entertaining, inspiring, and philosophical thoughts about cycling from writers (and riders) reflecting on the pleasures, power, and freedom of the bicycle. With beautiful black-and-white photos and illustrations on every spread,

this elegant collection of quotations is sure to motivate anyone to get on their bike and enjoy the ride.

Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates.

Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.
