Berkeley Electronic Press Selected Works

"Drawing on wide-ranging literature from a variety of relevant disciplines, as well as their own extensive experience in teaching spoken English, the authors give a fascinating, comprehensive, and insightful account of the nature of second language speaking skills. The research and theory they survey then serves as the basis for the principles, strategies, and procedures they propose for the teaching of spoken English. This book will, therefore, provide an invaluable resource for teachers, teachers in training, and researchers, providing both a state-of-the-art survey of the field as well as a source of practical ideas for those involved in planning, teaching, and evaluating courses and materials for the teaching of spoken English"--

This is the first complete biography of Maxim Litvinov, a Bolshevik revolutionary who began his professional life running guns into Tsarist Russia and eventually became the leading Soviet diplomat in the turbulent 1930s. His was a spectacular career, spanning some of the most dramatic decades of the twentieth century and including an unsuccessful effort to contain Hitler with the cooperation of the Western Allies. Litvinov's subsequent replacement as Soviet foreign minister by Molotov in 1939 signaled the dramatic shift in Soviet foreign policy that led directly to the outbreak of World War II. After the war, Litvinov's final public act was to bluntly warn the West of the danger presented by Stalin's cold war policies-a threat Litvinov even dared to compare with that posed by Hitler a decade earlier. Litvinov's career ended in the relative obscurity from which it had sprung, his consistently pro-Western policies no longer consonant with the reemerging Soviet hostility toward the West. Passing away from remarkably natural causes in 1951, Litvinov left behind a political legacy that lay dormant for forty years until its recent revival by Mikhail Gorbachev. Between the Revolution and the West is based on extensive research in the Soviet Union and the West, including previously unavailable archives and interviews with Litvinov's friends and family. Hugh Phillips' work casts light not only on Litvinov the man but also on Soviet foreign policy during crucial and dramatic times.

The Routledge Handbook of Arabic Linguistics introduces readers to the major facets of research on Arabic and of the linguistic situation in the Arabic-speaking world. The edited collection includes chapters from prominent experts on various fields of Arabic linguistics. The contributors provide overviews of the state of the art in their field and specifically focus on ideas and issues. Not simply an overview of the field, this handbook explores subjects in great depth and from multiple perspectives. In addition to the traditional areas of Arabic linguistics, the handbook covers computational approaches to Arabic, Arabic in the diaspora, neurolinguistic approaches to Arabic, and Arabic as a global language. The Routledge Handbook of Arabic Linguistics is a much-needed resource for researchers on Arabic and comparative linguistics, syntax, morphology, computational linguistics, psycholinguistics, sociolinguistics, and applied linguistics, and also for undergraduate and graduate students studying Arabic or linguistics.

Although scientific models and simulations differ in numerous ways, they are similar in so far as they are posing essentially philosophical problems about the nature of representation. This collection is designed to bring together some of the best work on the nature of representation being done by both established senior philosophers of science and younger researchers. Most of the pieces, while appealing to existing traditions of scientific representation, explore new types of questions, such as: how understanding can be developed within computational science; how the format of representations matters for their use, be it for the purpose of research or education; how the concepts of emergence and supervenience can be further analyzed by taking into account computational science; or how the emphasis upon tractability--a particularly important issue in computational science--sheds new light on the philosophical analysis of scientific reasoning.

Argues that rising powers challenge international order when their status ambitions seem to be unjustly and permanently blocked.

Every ninety years, twelve gods incarnate as humans. They are loved. They are hated. In two years, they are dead. The team behind critical tongue-attractors like Young Avengers and PHONOGRAM reunite to create a world where gods are the ultimate pop stars and pop stars are the ultimate gods. But remember: just because you're immortal, doesn't mean you're going to live forever. Collects THE WICKED + THE DIVINE #1-5.

In a contemporary setting of increasing social division and marginalisation, Policing Hate Crime interrogates the complexities of prejudice motivated crime and effective policing practices. Hate crime has become a barometer for contemporary police relations with vulnerable and marginalised communities. But how do police effectively lead conversations with such communities about problems arising from prejudice? Contemporary police are expected to be active agents in the pursuit of social justice and human rights by stamping out prejudice and group-based animosity. At the same time, police have been criticised in over-policing targeted communities as potential perpetrators, as well as under-policing these same communities as victims of crime. Despite this history, the demand for impartial law enforcement requires police to change their engagement with targeted communities and kindle trust as priorities in strengthening their response to hate crime. Drawing upon a research partnership between police and academics, this book entwines current law enforcement responses with key debates on the meaning of hate crime to explore the potential for misunderstandings of hate crime between police and communities, and illuminates ways to overcome communication difficulties. This book will be important reading for students taking courses in hate crime, as well as victimology, policing, and crime and community.

The question of ' why ' and ' how ' certain individuals are drawn towards behaving in a way that contravenes the ' Law of the Land ' is not an easy one to address. Researchers from various different fields have nevertheless attempted to develop theoretical explanations for the existence of different types of crime and why some individuals commit such acts. Crime and Criminality draws on criminology, sociology, psychology and neuroscience to offer a balanced perspective of crime, the criminal and criminality. Coverage includes: a comprehensive discussion of theoretical approaches to criminal behaviour, including biological, social and ' rational choice ' approaches; an analysis of legal and social definitions of crime and how these definitions influence the way specific behaviours are labelled as criminal; an examination of different types of crime and criminals, from delinquents to ' psychopaths ' and sex offenders; an exploration of different ways in which crime is predicted, including risk assessment and offender profiling and an overview of investigative techniques. Addressing a broad range of topics and offering a synthesis of competing theoretical explanations of criminality, this book is essential reading for students taking courses in criminology, criminal psychology, criminal behaviour, forensic psychology and psychological criminology.
