(PDF) Strategic Information Systems Planning

Too often strategic plans simply sit on shelves or are submitted for purposes of securing capital/grants, but at that point their life ends. Strategic planning is useful only if it becomes the basis for management action. In short, a planning system must be alive. Plans, both long and short-range, should be made annually.

Components of an Effective Strategic Planning System

Strategic information systems (SIS) are information systems that are developed in response to corporate business initiative. They are intended to give competitive advantage to the organization. They may deliver a product or service that is at a lower cost, that is differentiated, that focuses on a particular market segment, or is innovative.
