Basically
supercharging
means supplying
high pressure air to
the engine. When
the high pressure
air is supplied to
the engine, the
mass flow rate of
fuel also increases

and consequently it
results in more
power output.
Hence the
efficiency of the
engine also
increases. So, the

new ways to boost engine power and make it faster..

One way is to build a bigger engine to add more power.

But bigger engines means more weight and more cost to build and maintain, and they are not always better.
