All Things Fun & Fascinating is the perfect tool to help teachers and parents of 3rd-5th graders teach writing with a clear, simple, step-by-step method using subjects that will fascinate young students. The lessons are meant to be a resource for teachers already familiar with Teaching Writing: Structure and Style.

Rhetorical analyses of the Pauline letters concentrate on the way in which Paul went about persuading his readers by means of his letters. Normally scholars employ ancient rhetorical models to explain this. D. Francois Tolmie's study represents the first attempt to reconstruct Paul's rhetorical strategy in the Letter to the Galatians in a different way, namely by concentrating on the letter itself in order to develop the best categories for describing the way in which Paul tried to persuade his readers.

One cadaver, two cadaver, three cadaver, four... Ever had one of those days? A surprise visit from her father—who's on the run from the law—has given Carlotta Wren a lot to think about. Should she join her former fiancé, Peter, in proving her father is innocent? If she does, are her body-moving days over? And then... A close friend's behavior begins to spin out of control... The cops turn up the heat on her father's case... Carlotta discovers that her brother Wesley's gambling debts are child's play compared to his new vice... And the Charmed Killer, a serial murderer, unleashes his wrath on Atlanta. Now the bodies are piling up—and Carlotta's father is the number one suspect!

Covers all aspects of this topic, detailing surgical techniques and practices, medical conditions, social controversies, and the history of cosmetic and plastic surgery.

If an animal spoke to you, would you listen? Botanist/psychokinetic Katrina Omstead creates a super hash, a variety of marijuana she calls MAGIC. Before she can share her successful medical findings with the scientific community, she's murdered. There is, however, one witness begging to come forward. Special is Katrina's wolf-hybrid dog. She saw her mistress die. She wants revenge. Now she has to convince food photographer, animal psychic, and Katrina's best friend Wheat Keigwin of the same thing. Together, dog and woman dedicate themselves to solving the mystery behind Katrina's death. An agriculture journalist, Lena Jo McCoy has long admired the works of animal behaviorists Temple Grandin and Cesar Millan, as well as the cattlemen and women she's written about. She enjoys a cutting horse or stock dog competition, finding the connection between man and beast incredible as they work together as one entity. It wasn't until McCoy had a dream about her childhood dog, Special, that she sat down to write a novel.

What should be government's role in a market-oriented health caresystem? What's the appropriate amount of regulation? Who should regulate-states, federal government, or marketforces? What role do the courts play in this regulation? Are there existing models that might guide leaders in designing aneffective regulatory structure? Welcome to the great managed care debate. In Regulating ManagedCare, twenty-six of the nation's leading health policy experts givehealth care administrators, clinicians, and policy makers insightinto the issues behind this critical exchange and provide leaderswith a road map to assess the policy options available to protectthe quality of our health care delivery system. "This collection of papers, from an extraordinary group of authors,makes a valuable contribution to the ongoing policy debate and willbe of interest to anyone concerned with the future of our healthcare system."---Charles A. Sanders, retired chairman and CEO GlaxoInc. and former general director, Massachusetts General Hospital

Differential Geometry is a wide field. We have chosen to concentrate upon certain aspects that are appropriate for an introduction to the subject; we have not attempted an encyclopedic treatment. In Book I, we focus on preliminaries. Chapter 1 provides an introduction to multivariable calculus and treats the Inverse Function Theorem, Implicit Function Theorem, the theory of the Riemann Integral, and the Change of Variable Theorem. Chapter 2 treats smooth manifolds, the tangent and cotangent bundles, and Stokes' Theorem. Chapter 3 is an introduction to Riemannian geometry. The Levi-Civita connection is presented, geodesics introduced, the Jacobi operator is discussed, and the Gauss-Bonnet Theorem is proved. The material is appropriate for an undergraduate course in the subject. We have given some different proofs than those that are classically given and there is some new material in these volumes. For example, the treatment of the Chern-Gauss-Bonnet Theorem for pseudo-Riemannian manifolds with boundary is new.

When her father loses the family's Nevada ranch in a poker game, Hope McNaughton decides to win it back-from New Jersey Mafia boss Big Julie Saladino. She hasn't played cards in a while. But she's got time?thirty days. Thirty days before they have to move out or swim with the fishes.Hope calls on her honorary uncles-who are totally legit, honestly-to sharpen her game. Poker champion Tanner Wingate-whose shady past is all behind him, really-wants to pull her out of that deep water and into his life. When she and Tanner both wind up in the Big Game with Big Julie, only one of them can win. And whoever walks away with the pot will be the biggest loser. But Tanner knows that the game's not really over until the fat lady sings, and all they need is a fake-black ops mission to discover that love's not such a gamble, after all.

Perfekt für alle Theater Schauspieler, Sänger, Tänzer und Darsteller. Genau richtig, wenn du Drama, Broadway und Musik Shows liebst. Tolles Geschenk, wenn du Fan von Musicals bist und es liebst dich zu verkleiden und in eine andere Rolle zu schlüpfen
