time. For example a 5-minute candle represents 5 minutes of trades data. There are four data points in every candlestick: the open, high, low and close.

### ~~Candlestick Charts for Day Trading – How to Read Candles~~

Software trading platforms automatically chart streaming price data, perform intricate calculations, and apply indicators. Long gone are the days of graph paper and pencil. All the technical trader needs to do is choose an indicator (or indicators) and interpret the data. In the case of the candlestick chart, indicators are best applied as overlays. A chart overlay is simply the transposition of such indicators as moving averages, Bollinger Bands, and Fibonacci tools on existing candlesticks.

### ~~Tips for Using a Candlestick Chart in Futures Trading~~

Candlestick Charts Just above and below the real body are the “shadows.” Chartists have always thought of these as the wicks of the candle, and it is the shadows that show the high and low prices of that day’s trading. When the upper shadow (the top wick) on a down day is short, the open that day was closer to the high of the day.

### ~~How to Trade with Candlestick Charts Like a Pro ...~~

Most trading charts you see online will be bar and candlestick charts. They give you the most information, in an easy to navigate format. Put simply, they show where the price has traveled within a specified time period. The size of the bar/candle depends on the time frame you have opted for.
