Under the label of "the socialist market economy with Chinese characteristics," the Chinese Government has made a firm commitment to economic reform, though still retaining tight political control. Thus, under conditions of liberal economic systems and autocratic rule, a new capitalist system is emerging in China; its top companies are managed by private entrepreneurs, government bodies or a combination of both. This book, presented in an easily accessible

format, fills an important gap in the growing literature on China in the global economy and provides a research reference tool on China's top companies. It contains a comprehensive directory listing of the Top 100 corporations in China, thus enhancing the research potential on China for students, researchers and businesses is alike. As a general reference guide to the Chinese economy, A Guide to the Top 100 Companies in China provides up-to-date and comprehensive coverage of the top Chinese enterprises. Corporations from Hong Kong and Taiwan that conduct significant business in China are also included.

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings
Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Water plays a vital role in shaping our built environment, as it has done for centuries. We depend on it, we use it, we live with it and we must respect it. Aquitecture is the first book to outline new ways of 'designing for water,' using examples from around the world to illustrate methods of utilizing water innovatively, efficiently and safely. The first part of the book explores the historical relationship between water and architecture, examining how cities and civilisations have been drawn to water and have attempted to control it. The chapters go on to assess how this relationship has changed over time, and introduce readers to a range of brand new techniques that will revolutionise the way we think about water, design and urban planning. Solutions such as amphibious housing, wet-proof buildings, zero carbon development, rain gardens, flood storage and new methods of waterfront design are discussed and their effectiveness assessed. Full colour illustrations and international case studies are used throughout the book to bring these new theories to life; practical, technical advice sits alongside truly groundbreaking and ambitious ideas for the future. This book is an ideal
